BALL MOTION

Finished with a High Gloss Polish, the DV8 Too Reckless projects easily through the front of the lane, revving hard on the backend to create a very strong and continuous motion that drives through the pins on medium to light oil lane conditions.

REACTION SETUP

The DV8 Too Reckless can be drilled using the standard drilling techniques developed for bowling balls with symmetric cores.

BALL MAINTENANCE

To reduce oil absorption and remove dirt from the surface of the ball, clean your ball with a cleaner designed for reactive bowling balls.

WARRANTY INFO

All DV8 bowling balls have been manufactured to the highest standards of workmanship and material in the bowling industry, and we warrant that they will be free of defects in materials and workmanship for a period of two years from the date of purchase. DV8 agrees to repair or replace this ball if at any time during the warranty period it is found to be defective in material or workmanship.
