

Nothing To Hate About The New Hater!

Haters are always gonna hate... but there is nothing to hate about this new DV8 ball on oily lanes! The new DV8 **Hater** is a hook monster and an excellent go-to for bowlers facing heavy conditions and for bowlers who need a little help getting the ball to hook. The **Hater** has a new core and cover combo; the ultra-aggressive Hater core is wrapped around the most violent version of the HK22 DV8 has used. HK22 Havoc Hybrid is finished with 1500 grit to bite through the oil. The Hellcat XLR8 and **Hater** are both made for oil, but the **Hater** will respond more on the backend for a better angle and more strikes!
