THE PERFECT FOLLOW-UP! TROUBLE MAKER PEARL

The Trouble Maker was a revolutionary ball featuring the first core designed specifically for no-thumb bowlers. The ball performed incredibly for all styles, even bowlers who use a thumb hole, but no-thumb bowlers saw more versatility from this ball than any other. Our DV8 Pro, Matt Ogle, had nine (yes, you read that right, nine) original Trouble Makers in his arsenal and has been requesting a cleaner and more angular version.

The **Trouble Maker Pearl** is the perfect follow-up. By adding HK22 with Inciter Pearl additives, this core and cover combination will be just what every no-thumb bowler needs to combat medium oil. Be sure to remember our layout system designed for no-thumb drill patterns and other educational materials developed for the Trouble Maker series; all of that information can be found if you use this QR code, or find us on our social media channels.
